FOR IMMEDIATE RELEASE

Brookstone Builders, Inc. Completes Saint Joseph Hospital Renovation Project

MANCHESTER, NH – (May 24, 2024) **Brookstone Builders, Inc.**, construction managers and general contractors headquartered in Manchester, New Hampshire, recently announced that they have completed a renovation project for **St. Joseph Hospital**.

The project involved interior renovations and the replacement of X-ray equipment in two radiology rooms at the hospital's Kinsley Street facility in Nashua, NH. The scope of work included interior demolition, replacement of existing ceilings, the addition of structural supports and walls, the relocation of control areas, and the installation of lead-lined protection walls and glass partitions. The radiology department remained in full operation during the project, which brought about the need for heightened safety, noise abatement, and scheduling protocols that are associated with working in and around occupied space.

Stephen Nichols was Brookstone Builders' Project Manager, and architecture was provided by **Tennant Goucher Architects** of Bedford, NH.

"We were happy to have been awarded this project," said **Paula Scales**, Brookstone Builder's President. "We have appreciated and enjoyed a strong working relationship with St. Joseph Hospital over many years, and look forward to the possibility of helping them with future expansion or renovation requirements."

A woman-owned enterprise, **Brookstone Builders, Inc.** was founded in 1984. The company provides commercial, industrial, and design-build solutions throughout northern New England, and has also been involved in a wide range of specialty and renovation projects.
