

FOR IMMEDIATE RELEASE

Brookstone Builders, Inc. Completes US Navy Shipyard Project

MANCHESTER, NH – (May 27, 2016) **Brookstone Builders, Inc.**, construction managers and general contractors headquartered in Manchester, New Hampshire, recently announced that they completed a renovation and construction project for the **US Navy**.

The project involved interior renovations to an existing chemistry laboratory as well as the construction of new office space on the mezzanine level of Building 357, a material storage facility at the **Portsmouth Naval Shipyard**. The scope-of-work included the installation of metal studs, flooring, ceilings, drywall work, plumbing, and the installation of HVAC and fire protection systems.

Erik Crisman was Brookstone Builders' Project Manager for both the renovations and new construction. The project also involved working in occupied space, as Navy personnel were able to maintain normal operations throughout the renovation and construction period.

"We have always appreciated our professional relationship with the Navy," said Brookstone Builder's President **Paula Scales**. "While our crews are well-experienced working in-and-around occupied space, the Navy's streamlined processes and straightforward protocols for communication were extremely helpful, and enabled us to more easily facilitate the enhanced scheduling and safety protocols necessary when working in an active environment."

A woman-owned enterprise, **Brookstone Builders, Inc.** was founded in 1984. The company provides commercial, industrial, and design-build solutions throughout northern New England, and has also been involved in a wide range of specialty and renovation projects.
