Brookstone Builders, Inc. Completes Historic Military Renovation Project

MANCHESTER, NH – (June 15, 2018) **Brookstone Builders, Inc.**, construction managers and general contractors headquartered in Manchester, New Hampshire, recently announced that they have completed an interior and exterior renovation project for the **US Navy**.

This design/build initiative involved renovations to a historic building (B99) at the **Portsmouth Naval Shipyard**, which houses administrative offices along with Marine Corp barracks. As is often the case with renovation work, the space was occupied and fully-functional during construction, requiring enhanced safety, noise control and dust abatement protocols.

The scope-of-work encompassed the replacement of the structure's slate roof including copper trim and downspouts, historic brick repairs and retooling, window maintenance and painting, and the restoration of the building's vintage front portico.

Erik Crisman was Brookstone Builders' Project Manager. **CCI Energy & Construction Services LLC** of Augusta, Maine was the primary contractor, and **Gale Associates** of Weymouth, Massachusetts served as the project's Designer of Record.

"We appreciate our ongoing professional relationships with the Navy and CCI," said Brookstone Builder's President **Paula Scales**. "It has been a great partnership involving numerous projects, each of which has been completed more effectively thanks to the Navy's streamlined processes and straightforward protocols for communication."

A woman-owned enterprise, **Brookstone Builders, Inc.** was founded in 1984. The company provides commercial, industrial, and design-build solutions throughout northern New England, and has also been involved in a wide range of specialty and renovation projects. For additional information please contact Ms. Paula Scales at (603) 641-9455 or visit www.brookbuild.com.
