

Commonwealth Motors Lawrence, MA

As general contractors for this project, Brookstone Builders coordinated and completed a two-phase expansion for

Commonwealth Motors of Lawrence, Massachusetts, which involved two of their automobile dealerships.

The first phase of the project involved the addition of a 1,800 square-foot service bay to Commonwealth Motors Honda on Commonwealth Avenue in Lawrence. The new steel-framed workspace was outfitted with an Exterior Finish Insulation System (EFIS) to match the stucco exterior of the existing building.

Phase two of the expansion initiative involved a similarly-sized concrete masonry unit (CMU) addition to the auto body shop at Commonwealth Motors Chevrolet, which is located directly across the street from the Honda dealership within Commonwealth Motor's Lawrence campus.

Each phase was completed on time and on budget. Commonwealth Motors was able to conduct business as usual without incident during construction.

JDL Associates, Inc. of Andover, Massachusetts served as the project's architect.
