

Admix Corporate Offices & Industrial Facility

Our most recent interaction with Admix, Inc. involved the completion of a 10,100 square-foot addition to their corporate and industrial facility on Abby Road in Manchester, NH.

Specializing in a wide range of advanced mixing technologies for sanitary and hygienic industries, Admix is using the building to house their corporate offices, to handle light manufacturing and for warehousing purposes. Varying degrees of specialties along with standard building, electrical and mechanical skills were required.

This is the second construction project Brookstone Builders has completed for Admix over the years, as we were selected to build the company's corporate headquarters back in 1998.

"It was a pleasure to work with Brookstone Builders again," said **Lou Beaudette**, Admix President. "The final quality and workmanship was, once again, excellent; and a special thanks to the entire team for their exemplary attitude and on-time completion."
