FOR IMMEDIATE RELEASE

Brookstone Builders, Inc. Completes State of NH Renovation Project

MANCHESTER, NH – (March 25, 2026) **Brookstone Builders, Inc.**, construction managers and general contractors headquartered in Manchester, New Hampshire, recently announced that they have completed a renovation project for **the State of NH**.

The project was done for the State Department of Health & Human Services and the Department of Environmental Services at 29 Hazen Drive in Concord.

The scope of work included the removal and replacement of 19 air-handling units throughout the facility. Four of the units were also converted from steam to hot water heating by providing a new heat exchanger, trim, and pumping system. Four roof-mounted condensing units were also removed, and the existing chilled-water system was extended to serve in their place. Electrical work and integration into the existing fire alarm system was also part of the project.

Stephen Nichols was Brookstone Builders' Project Manager, and **SAM Mechanical** of Hooksett, NH was the project's mechanical subcontractor. Electrical and mechanical engineering was done by **McFarland Johnson** of Concord, NH.

"We appreciate our long-standing relationship with the State of New Hampshire," said **Karen Scales**, Brookstone Builder's President. "In addition, our crews are especially well suited to the heightened safety, noise abatement, and scheduling protocols that are associated with renovation projects of this type."

A woman-owned enterprise, **Brookstone Builders, Inc.** was founded in 1984. The company provides commercial, industrial, and design/build solutions throughout northern New England, and has also been involved in a wide range of specialty and renovation projects.
